# DESSERT BASES

**Martini Food Service Dessert Bases** are a range of liquid UHT products that are perfect for making excellent desserts and ideal for cafés, restaurants, hotels, beach resorts and ice-cream parlours.

Set apart by the **high quality of the raw materials** used, their main feature is that they are extremely easy to use: excellent desserts can be created in just a few steps and then refined and decorated as desired.

Being so easy to use, preparation times are therefore minimized.

### There are just 3 simple steps:

1. pour the product
2. heat on a hob for a few minutes, without bringing to the boil, or in a microwave on full power, until it melts completely (for CREMA CATALANA, heat on a hob at approximately 100°C for a few seconds or in the microwave on full power, until it comes to the boil)
3. pour into the appropriate moulds and leave in the fridge for 1-2 hours

UHT treatment guarantees perfect sterilization of the products. All the products should be stored in a cool, dry place (max 20°C) and do not require cold-chain transport.

### FEATURES

- No hydrogenated fats
- UHT sterilized
- Quick and easy to prepare
- Consistent quality
- A refrigerated environment is not required for storage (simply store in a cool, dry place, max 20°C)
- Long shelf-life
